MucXic Partnership Programme pilot

Indicative bonus: UGX 2.00 per qualified stream.

Monthly programme fund: UGX 1000000.00; artist cap UGX 300000.00.

Minimum payout UGX 50000.00; streams mature after 30 days.

Amounts are prorated when valid earnings exceed the monthly fund.

MucXic promotional drops generate no artist or platform ad revenue.

Future paid ads: artist 55% and MucXic 45% of net attributable ad revenue.

Invalid, self, automated, repeated or manipulated streams earn nothing.

How sales and gifts are calculated

The platform share is calculated when a successful payment is settled.

The beneficiary remainder is credited to their wallet and ledger.

Known processor charges and taxes are recorded separately.

Refunds and reversals must reverse the original settlement allocations.

Creator campaign example

Creator rewards UGX 38,500; MucXic fee 12% = UGX 4,620.

Artist total before payment-rail costs = UGX 43,120.

Creators collectively receive the complete UGX 38,500 reward budget.

Accounting treatment

MucXic platform fees are platform revenue.

Artist and creator balances remain beneficiary payables until withdrawn.

Frozen campaign rewards remain escrow liabilities until paid or refunded.

Every settlement stores gross, rate, fee and beneficiary amount.

See the current online policy on MucXic for future amendments.
